Ontologies And Semantic Technologies For Intelligence Volume 213 Frontiers In Artificial Intelligence And Applications
The novel opens with Aunty Polly searching the house in search of her nephew, Tom Sweeny. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunty Polly turns, Tom escapes over the fence. After Tom is gone, Aunty Polly reflects sadly on Tom’s naughtiness and how she lets him get away with too much.

Tom comes home at supper time. Despite Aunty Polly’s warning, he has been skipping school that afternoon and is wet with rain. When he enters the house, Aunty Polly is satisfied. Tom had fallen asleep on the way home, and the rain had washed the dirt off him. He is now dry and clean.

Tom goes out of the house into the rain, calling for his accordion, which he has left behind. He calls loudly for it, but it is not found. Aunty Polly is concerned, and Tom goes into the back room to look for it. Aunty Polly is almost satisfied when Tom returns without his accordion, but not quite.

When he returns home in the evening, Tom finds Aunty Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunty Polly sends Tom out to whitewash the fence. Tom goes by, and Tom tries to get him to do some of the whitewashing in return for a “white alley,” a kind of pasture. Tom almost agrees, but Aunty Polly appears and chases him off, leaving Tom alone with his tasks.
The novel opens with Aunt Polly scowling the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s naughtiness and how she lets him get away with too much.

Tom comes home at suppertime and is surprised to find himself the center of attention. During supper, Aunt Polly tells him that he will have to be shipped school that afternoon and even worse news—Tom is to be sent to a new school. To make matters worse, Tom’s best friend, Huck Finn, is still away from home, but for Tom, this is just one more adventure. Tom’s aunt is satisfied, and Tom has sworn the deuce to disguise his distress.

Tom goes out of the house into the yard. The sound of whistling catches his ear. When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whiten the fence. His progress is slow, and Tom tries to get him to do some of the whitewashing in return for a “wax alley,” a kind of marble. His offer is refused, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.

What is a Vocabulary? On the Semantic Web, vocabularies define the concepts and relationships (also referred to as “terms”) used to describe and represent an area of concern.

Semantic Web ontology - World Wide Web Consortium (W3C)

Semantic Web - Wikipedia
Linked Data. The Semantic Web is a Web of data — of dates and titles and part numbers and chemical properties and any other data one might conceive of.

1. Introduction. In information management systems, structured query formulation languages are one means of retrieving information. Writing structured queries is a powerful method to access data since it allows end-users to formulate complex database queries by learning specialised query languages.
